flask django sockets

WORK EXPERIENCE (7)

Senior Principal Mobile Engineer at Mindgrub Technologies LLC March 2020- Current

<https://mindgrub.com>

Developing software for iOS and Android, as well as functioning as a technical lead, making architecture decisions at the early stages of projects, and reviewing code and providing support as projects continue.

- Architect, build, and ship applications for clients like Exelon, MD Lottery, Idaho Power, and many more.
- Meet with clients to understand product vision and consult on new technology and how to leverage it for success.
- Provide support for devs working on my project, helping with blockers, or reviewing code
- Mentoring junior devs on best practices, and new technology

Senior Application Engineer at Leafly Holdings LLC May 2018- March 2020

<http://leafly.com>

Architect, build, and maintain the Leafly Android and iOS apps. Adding new features and capabilities to peoples shopping experience. As well as mentoring junior engineers

- Totally re-architect the android app and rewrite the app in flight over the course of a year (project Theseus)
- Design, build, and code a system that allows for easy re-ordering of product from dispensaries
- Build a system that acts as a kiosk for customers within dispensaries
- Architected a system that indexes strains locally on devices so that those results can appear in native global search systems (plus Siri and google assistant)

Senior Software Engineer at Stanley Black & Decker **February 2017- May 2018**

<http://www.stanleyblackanddecker.com/>

Invent and prototype potential future hardware and software products. As well as present them to upper management

- Design, build, and code a system that bridges Zigbee and Zwave IOT networks
- Build a system that pilots heavy machinery based off of openCV video input
- Design build and ship a system that locates tools indoors, and on job sites
- Various ARKit/Hololens augmented reality demonstrations

Director of Mobile Engineering at Mindgrub Technologies LLC **October 2016- February 2017**

<https://mindgrub.com>

Manage a team of 7 engineers and 3 interns, as well as architect and implement native mobile and web applications using the latest technology and methodologies

- Architect, build, and ship applications for clients like MD Lottery, Under Armour, Wendy's, and many more.
- Meet with clients to understand product vision and consult on new technology and how to leverage it for success.
- Successfully transitioned the team from a waterfall structure to agile processes with constant feedback and improvement
- Promoted the creation of automation software internally, to create a more efficient, less stressful work environment

Senior Software Engineer at Mindgrub Technologies LLC **May 2014- October 2016**

<https://mindgrub.com>

Software Engineer at Mindgrub Technologies LLC **March 2013- May 2014**

<https://mindgrub.com>

Mobile Engineer at Accella LLC **June 2010- March 2013**

<https://accella.net>

VOLUNTEER
